

# UNIT 5

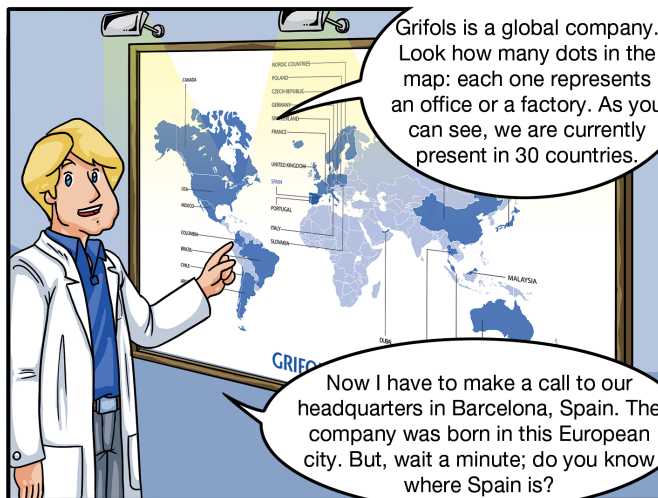

## COMIC 5.2

Hello again Rookies! Now that you are almost experts in laboratory issues, what do you think about learning a little more about Grifols in the world, as well as other interesting facts?

**GRIFOLS**

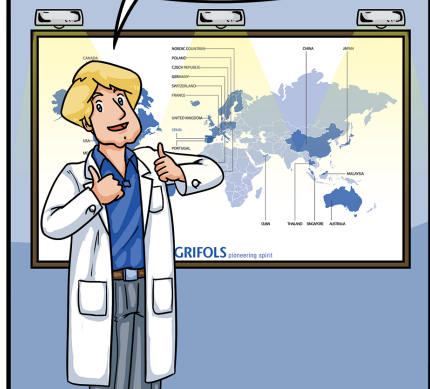

Grifols is a global company. Look how many dots in the map: each one represents an office or a factory. As you can see, we are currently present in 30 countries.

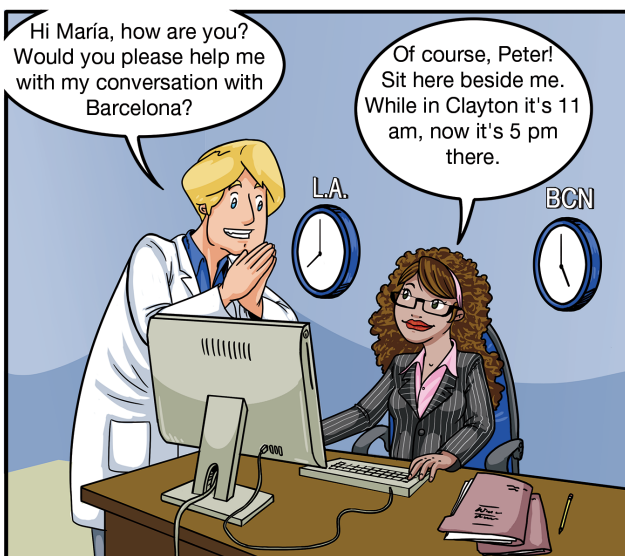

Now I have to make a call to our headquarters in Barcelona, Spain. The company was born in this European city. But, wait a minute; do you know where Spain is?

I can't speak Spanish, but everyone in the company speaks English. Anyway, I'd like to learn a few words in Spanish, and María, executive assistant in my team, will help me to do that.

Hi María, how are you? Would you please help me with my conversation with Barcelona?

Of course, Peter! Sit here beside me. While in Clayton it's 11 am, now it's 5 pm there.

¡Hola colegas! ¿Cómo estáis? Peter y yo estamos listos para empezar la videoconferencia.

Hola Peter y María. ¿Qué hora es en Clayton?

Now it's your turn Rookie! Check the available resources in the VIRTUAL LAB. You'll need them for the game we'll play in class later.

We will deal with and go over varied issues, regarding different Grifols aspects: from related language, culture, history or geography issues, to focus on science and technology areas, and even social aspects. Let's get started!
